FORTY YEARS SOUGHT FOR!

No Soot! No Clinker! No Gas! No Nuisance!

THE GREENE Soft Coal Cooking Stove!

This New Stove consumes all varieties of Bituminous Coal without forming Clinkers, Making Soot, Creating Gas or Nuisance of any kind, and is especially adapted to burn Slack Coal or Culm, Wood, Corn or Corncobs perfectly. It is a good COOKER, BAKER and BROILER; Quick in Operation, and possesses the merit of GREAT ECONOMY. In fact, it is Perfection in the way of a Cooking Stove. It is easily cared for—the grate is never dumped, no ashes to sift or clinkers to remove, is cleanly in its operations, and is of GREAT DURABILITY.

THE ANNEXED TESTIMONIAL IS ONE OF THE MANY RECEIVED

From H. S. Chamberlain, Esq., President of the Roane Iron Company.

CHATTANOOGA, TENN., JAN'y 11, 1880.

Gentlemen:

Hearing the Greene Stove highly spoken of as being very economical in fuel, and satisfactory for family use, I some months since procured a No. 9 Cooking Stove of this pattern, and after thorough trial find it even better than I had expected. I have tested it carefully with all sorts of coal found in this section including the Tennessee, Dado, Soddy, Knoxville, Daisy and Rockwood, and find that any of these can be burned either fire or course, without clinker and with very great satisfaction. The stove is emphatically a smoke consumer, in which all gases usually wasted up the chimney are utilized, and is point of economy I am within the mark when I say the amount of coal consumed for ordinary cooking and other kitchen purposes is less by one half than in any other stove with which I am acquainted in the market. Its cooking qualities are supremely excellent. It is the only soft coal burner known to me which can be used pleasantly and economically in the kitchen, and being quickly heated and as free from dust and dirt as a wood stove, must, as soon as its merits are known, take the place of all other varieties. I am very glad to say this much for your stove, as it is gratifying to see an effort to apply valuable scientific principles in household economies meet with such merited success.

I am very truly yours,

H. S. CHAMBERLAIN.

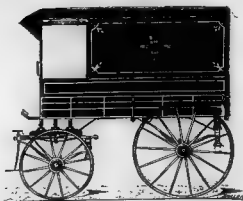

This Stove meets a want long felt in those regions where Bituminous Coal is a prevailing fuel. As this important invention, covering the Eastern and Western Continents, is the property of a Newark Company, Citizens having friends in the Bituminous Coal burning regions are invited to apply to the Company for Circulars and Testimonials, and thus extend the knowledge of this Newark Industry.

PREFACE.

This fifty-second volume of the Newark City and Business Directory appears before the public in its fullness. Its publisher has striven to render it what its name indicates, notwithstanding the innumerable obstacles in the way of obtaining information. Did all appreciate the importance of a directory, as a key to the city and a guide to the multitudes who seek its aid, much greater assistance would be extended, yet to the most unconcerned it is, a convenience and benefit in the hour of need. Some withhold information, others refuse entire, while others still, for causes best known to themselves, dread publicity and shun the light of record. All such must not murmur if those who seek them cannot find them, and those they seek cannot be found. One thing is certain, all who desire can be recorded without cost by the mere request only.

As for the City of Newark, it is increasing in prosperity and population, is well governed, is quiet and orderly and the people generally contented and happy. The free highway and cheap transit between this city and the metropolis, also the proposed ship canal through Bergen to connect the waters of the Passaic and Hackensack rivers with those of the Hudson and New York bay, thus opening a direct communication with the seaboard, are of deep interest to Newark, and have received a large share of public attention, and this must increase to obtain the desired result.

The benefit arising from the Newark Directory as a representative work and medium of information is demonstrated by the frequent orders and letters of inquiry relating to various interests of the city, received by its publisher from distant points. In furtherance of this object, it is placed in hotels, ocean steamers, foreign exchanges and other important places. For additional interest will be found a railroad map from New York to Washington, page 104, to seaside resorts, page 1182, also a map of the city; a map showing the territory lying between Newark and New York, and the various lines of communication between the two cities. For other matters, see table of contents, following pages.

Should any omissions or discrepancies appear, *all* are invited to communicate with the Directory office, as *all alike* are interested in having every individual properly recorded.

Maps of Newark, also of Essex county and various cities, also NEWARK STREET GUIDE and Business Directory may be obtained at the Directory office.

Directories of principal cities for public reference.

A Directory Register for annual changes in business and residence throughout the year is kept for public reference. All are invited to send postal of information to the above office.

—THE—

Albo-Carbon Light

THE PERFECTION OF GASLIGHTING.

Saves more than One-Half the cost of Gas.

CLUSTER LIGHTS

From 100 to 2,000

CANDLE & POWER,

—EQUAL—

In Effect to the Electric.

Brilliant,

Economical,

Steady.

THE PERFECTION

OF LIGHT

FOR THE HOME.

Our 1, 2 and 3 Light Generators, can be attached to any gas fixture.

AN IMPROVED SYSTEM OF LIGHTING

Churches, Halls, Public Building, Stations, Shops, Stores
AND PRIVATE HOUSES.

By our method of enriching the gas, we are enabled to give *three times the light* obtained by burning it the usual way, and to give a *soft, steady, white light*.

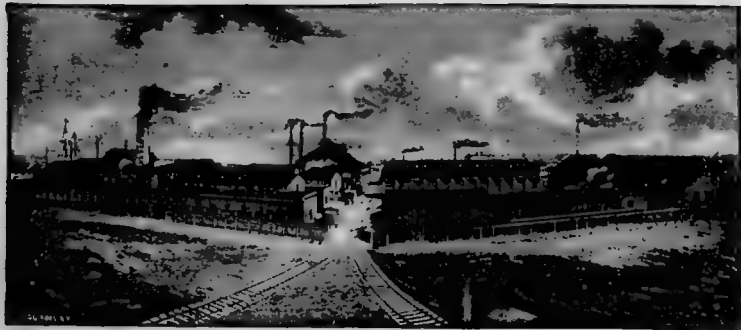

There are many thousands of them in use in England and on the Continent, and they are being rapidly adopted in this Country for every place where a brilliant, steady, pleasing and always reliable light is needed.

Prof. Stevens, A.M., LL.D., of Girard College, Philadelphia, writes: "Regarding candle power the carbonized gas is equal to 3.25 times the common gas."

G. H. Bosch's Pure Domestic Wine FOR MEDICINAL AND COMMUNION PURPOSES.

REASONS WHY Physicians recommend this wine in preference to all others:

FIRST—It is no imitation of any Foreign Wine.

SECOND—You buy it direct from the manufacturer, who sees to every detail himself, from the purchasing of the fruit to the time of bottling.

THIRD—There is not a drop of Alcohol used in its manufacture, nor any adulterations; it is therefore the Purest Wine in use. It is not an intoxicating but invigorating Wine, a pure blood strengthening tonic, to be had only in its purity.

Bosch's Celebrated Wine for Hoarseness and Colds.

THESE ENGINES

are manufactured from the best materials, the workmanship is of the best quality and finely finished.

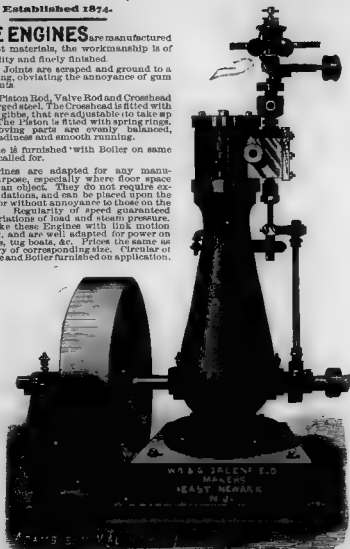

The Steam Joints are scraped and ground to a perfect bearing, obviating the annoyance of gum or paper joints.

The Shaft, Piston Rod, Valve Rod and Crosshead Pin, are of forged steel. The Crosshead is fitted with composition gibbs, that are adjustable to take up the wear. The Piston is fitted with spring rings. All the moving parts are evenly balanced, assuring steadiness and smooth running.

The Engine is furnished with Boiler on same base, when called for.

These Engines are adapted for any manufacturing purpose, especially where floor space and room is an object. They do not require expensive foundations, and can be placed upon the ordinary floor without annoyance to those on the other floors. Regularity of speed guaranteed under all variations of load and steam pressure. We also make these Engines with link motion for reversing, and are well adapted for power on steam yachts, tug boats, &c. Prices the same as the stationary of corresponding size. Circular of Yacht Engine and Boiler furnished on application.

This style represents the 3 to 70 Horse Power Engines.

their introduction.

The Association does not distribute alms. It aims to aid all established benevolent agencies of whatever creed, and every individual donor, to a more intelligent and efficient care of the poor.

It endeavors to exterminate giving to unknown persons, to punish fraud, and to secure for every worthy case of poverty in the city one friendly visitor, who shall report its circumstances monthly to a body representing all the organized and very much of the individual charity of Newark.

It offers to furnish gratuitously to proper inquirers, information concerning every applicant for charity, upon request, through an investigation ticket given to the applicant, and its already large store of information concerning thousands of cases will be augmented in proportion to your command of its services.

ELECTION OF PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES ELECTORAL COLLEGE.

"The voters elect in the several States as many persons as there are members of Congress, known as Electors. These electors meet at the State Capitals upon a fixed day, and cast the electoral vote of the State for President and Vice President. Copies of this vote are sent by messenger to the United States Secretary of State and to the President of the United States Senate, and opened and counted at a joint meeting of both houses of Congress in February following the election. The persons receiving the majority of the electoral votes for the two offices are declared duly elected President and Vice President of the United States for four years from the ensuing 4th of March. In case no party has a majority of the electoral vote, the election is made by the House of Representatives alone, each State casting one vote (which is controlled by a majority of the Electors), and a majority of all the States is necessary to a choice."

Post Money Orders, for sums not exceeding \$100 each order, can be obtained at the principal offices throughout the country. By the money order system, *absolute security* against loss is obtained. Money orders are good for one year from the date of issue. In case of their loss, no charge is made for the issuing of duplicates. Persons sending money orders should be careful never to send them in a letter which contains the name of the person from whom they are sent. This is necessary in order to guard against loss in case the letter should fall into improper hands; money orders *never* being paid to any person who cannot tell the name of the party to whom they were issued.

Postal notes for the transmission of small sums under five dollars, on which a fee of three cents shall be charged, were issued about October 1, 1883.

As letters are frequently dropped in the letter-boxes insufficiently paid, persons who are not certain in regard to weight, rates, etc., would do well to inquire of the Stamp Clerk before mailing them. If sent to the Dead Letter Office they are delayed two or three mails.

Residence of Janitor (Charles M. Bird), No. 128 William st.

The Academy was organized in 1792, incorporated in 1795, and rechartered in 1855. It is controlled by a Board of Trustees, elected by the stockholders.

Its object is to afford to the youth of this city and vicinity a complete and thorough course of study, as a preparation for the College, the Scientific School, or for business life. The Primary Department prepares pupils for the higher classes, so that a boy may enter the Academy at the very commencement of his school course, and finish there his entire preparation.

There are two courses of study, the Classical and the Scientific, each extending through four years. Pupils finishing satisfactorily either of these courses are entitled to the diploma of the Academy. Those, however, who have not time to complete a full course of study may select from either such branches as are best suited to their plans for life.

NEWARK INDUSTRIAL INSTITUTE.

Chartered March 21, 1873. Capital, \$150,000.

"The object of this Association is the encouragement and advancement of manufactures and the mechanical arts of the city

For Contents of this Work, see p. 23.

of Newark, and the development of its capacity as a centre of manufacturing industry, by the holding of exhibitions of its products, and the encouragement of a knowledge of science and art in their relations to arts and manufactures." (This chartered institution was the outgrowth of the Newark Industrial Exhibition of 1872, through which the name of Newark, as a great manufacturing city, was made known throughout the world. By this exhibition it was demonstrated that Newark possessed an abundant variety of manufacturers to hold an exposition exclusively of its own products, which no other city in the world had attempted. Its success was pre-eminent—netting a surplus of 10 per cent. Value of exhibits, \$900,000, its visitors, 115,000, and from every part of the globe. The exhibitions were suspended in 1876, owing to the draft upon our manufacturers by the Centennial Exhibition at Philadelphia.)

A SIMPLE MODE OF COMPUTING INTEREST.

Multiply any given number of dollars by the number of days of interest required, separate the right hand figure and divide by six. The result is the true interest for such a number of days at six per cent. This rule is simple and true, according to all business usages. There being no such thing as a fraction in it, there is scarcely any liability to error or mistake, and by no other arithmetical process can such desired information be obtained with so few figures.
